CADAC GREENGRILL

The CADAC GreenGrill is a premium, PFAS-free ceramic coating that is on most of our cooking surfaces. Engineered as a healthier and more environmentally friendly alternative to traditional non-stick coatings, GreenGrill is made from non-toxic materials and designed for exceptional durability. Its robust surface withstands higher cooking temperatures and delivers superior heat distribution for perfectly even cooking results. The coating also retains heat efficiently, reducing gas (or electricity) consumption and ensuring consistent performance with less energy use. In addition to its outstanding cooking properties, GreenGrill surfaces are easy to maintain — simply clean with water and mild detergent, or use CADAC Soft Soaks (see page 48) for optimal results. Combining durability, performance, and safety, GreenGrill represents the next generation of non-stick technology for a cleaner, greener cooking experience.

FFD APPLIANCES

Many of our newer barbecues are equipped with an FFD (Flame Failure Device) — an advanced thermal safety feature that automatically cuts off the gas supply if the flame is accidentally extinguished. This built-in safeguard ensures safe cooking at all times, preventing gas leaks and providing peace of mind whether you're barbecuing outdoors or preparing a meal inside your tent, campervan, or motorhome. With FFD-equipped models certified for both indoor and outdoor use, CADAC barbecues deliver the perfect balance of performance, safety, and versatility for every adventure.

VAN COOK FFD

Your Compact Culinary Companion on the Road

Designed with van-life in mind, this stove is the ultimate solution for cooking on the go. Whether you're living full-time on the road, heading out for a weekend trip, or simply enjoying the freedom of mobile living, its compact size makes it the perfect addition to any van kitchen.

Crafted for convenience, the small footprint fits effortlessly into tight spaces, cupboards, or kitchen drawers — ideal for minimalist setups where every centimeter counts. Despite its compact form, it packs a serious punch with a high quality burner that delivers fast, even heat. The built-in flame failure device (FFD) ensures extra safety because the gas supply is automatically turned off when the flame is extinguished unexpectedly. This makes cooking safe in both indoor and outdoor environments.

Powered by a detachable gas cartridge, this stove offers true portability with a hassle-free setup. There's no need for bulky cylinders or complicated fittings — simply insert the cartridge, where a secure magnetic connection locks it into place, ignite,

and you're ready to cook. The user-friendly design provides safe, reliable ignition every time, and the adjustable flame control gives you precise cooking power.

To add even more versatility, it comes standard with a splattershield, a BBQ plate, and a pot support, giving you the freedom to grill, boil, and cook with less mess depending on what's on the menu. The splattershield helps protect your van or outdoor setup from grease splashes, while the BBQ plate can be easily removed or placed using the included detachable handle, making both cooking and cleaning safer and more convenient, even in tight spaces. For added convenience, mounting brackets are included, allowing you to securely install it in your kitchen setup when you need a more permanent solution.

Whether you're parked by the beach, camping in the mountains, or enjoying a quiet day in the countryside, this stove is your reliable travel companion — lightweight, efficient, and always ready for your next adventure.

CLEANING & MAINTENANCE

How do I maintain the CADAC cooking surfaces?

Most of our cooking surfaces (like the paella pan and BBQ grid) have our GreenGrill ceramic coating. Always use wooden or plastic utensils to avoid damaging this coating. Our GreenGrill Brush is perfect for cleaning these GreenGrill coatings.

You can clean the surfaces in (warm) water with a soft sponge or dishwashing brush. You can also use the CADAC barbecue cleaner. Never use scourers or abrasives.

How do I clean my BBQ grid?

By using the Soft Soak your grill does not get so damaged as traditional scrubs, brushes and chemicals would. The method of leaving the grill to soak in this soft protected environment loosens food and hard to remove grit without the need to scrub and scrape your grills coating off.

How do I maintain my CADAC barbecue?

To enjoy your CADAC product for a long time, we advise you to thoroughly clean it after each use. Use a full-length, UV-resistant cover when you do not use your BBQ.

Note that our covers are water resistant but not 100% waterproof. If you do not use your BBQ for a longer period, store your barbecue in the storage bags or put it in a garage or shed underneath a decent BBQ cover.

How do I clean the fat pan?

While you barbecue, the fat will drip into the fat pan. If you place some water with vinegar or some sand into the fat pan before use, you can easily skim the fat afterwards. If you don't remove the fat from the fat pan on a regular base you will increase the chance of "flaring".

How do I clean my Skottel?

The Skottel stays clean by using CADAC non-stick liner; after use, the liner can be cleaned by simply rinsing with hot water or in a dishwasher. If you don't use the liner, you can clean the Skottel by boiling some water with detergent in it. After that the Skottel can be easily cleaned. It can also be easily cleaned with the CADAC BBQ Cleaner.

How do I perform a leak test?

When you connect a hose to your bbq, we recommend to perform a leak test. Always do this outdoors! Prepare a mixture of water (1 part) and detergent (1 part) and spread it on the gas connection. Then turn the gas on. When bubbles appear on the connection, there's a gas leak. You must reconnect the hose. Always close the gas supply of the cylinder/cartridge before you close the gas supply of your barbecue. If the bubbles appear again in a second test, please contact your CADAC dealer.

SOFT SOAK CLEANING

Durable, easy and hygienic

Made from food grade silicone, the environmentally friendly Soft Soak range takes the hassle out of cleaning. Soaking your grill plate before washing means less time spent on cleaning, and more time for you to enjoy the outdoors. No mess, no fuss!

Prolongs your grill pans life

When you use the Soft Soak to clean the grill you maintain the performance of the ceramic coating, cleaning your cooking surfaces without the need for traditional scrubs, hard brushes and harsh chemicals that would otherwise risk damage to these cooking surfaces.

Easy Clean

Soaking your cooking surfaces with the help of the Soft Soaks, facilitate for the easy cleaning of your cooking surfaces loosening and softening grease with the aid of soapy water. A hygienic material that lasts!

Fits and protects your grill

Every Soft Soak is specially designed for its corresponding Cadac grill size. It contains the grill and water perfectly ensuring coverage and complete soakage.

Stackable and lightweight

The moulded shape of the Soft Soaks allows for easy stacking, taking up less space and making it easier to take with you when you are on the go!

How to properly use the Soft Soak with your grill & pans

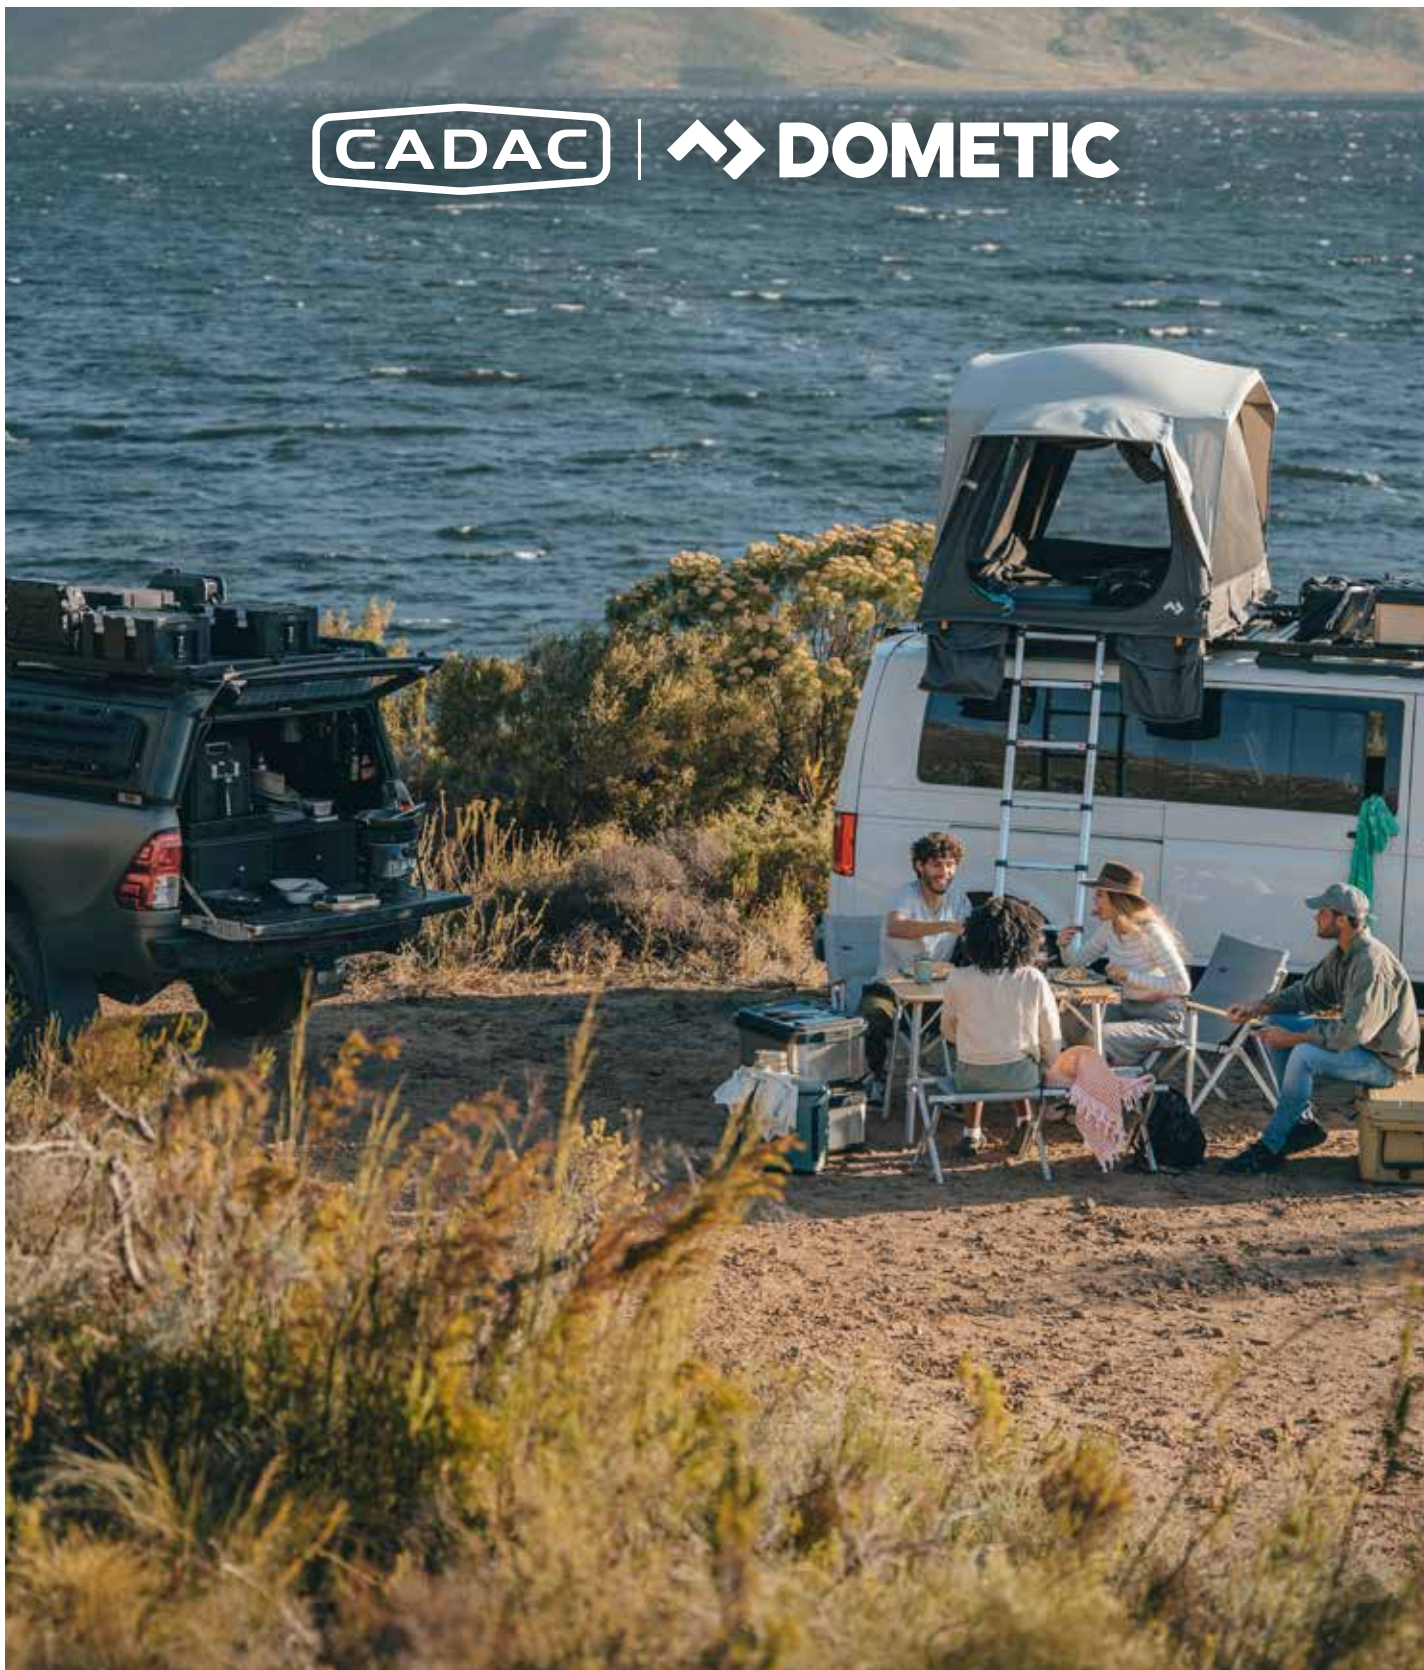

1. Pour hot, soapy water into Soft Soak
2. Place grill upside down
3. Soak for 10 minutes to ensure all the food has lifted properly
4. Easy clean with a cloth
